

SOUTH LAKE CONTINUES CROSSCUT ON 600 LEVEL

OBJECTIVE POINT, 1,400 FEET
FROM SHAFT TO REQUIRE
SIX MONTHS.

All development work other than driving the long crosscut on the 600-foot level at South Lake has been discontinued. This crosscut has been advanced a total of 350 feet from the shaft, and at the present time, about 6 feet daily is being made with this work. At the present rate, it will require about six months before the objective point, or 1,400 feet from the shaft, has been attained, although it is possible this time may be shortened somewhat if the formation further in is softer and more easily worked. At present, it is very hard.

It was the plan of the management to open up the Evergreen lode on the 300 ft. level and ship the rock as taken out to the mill, but owing to the low price for copper and the present financial stringency, directors deem it best to husband their cash and prosecute the work on the lower level only. About \$3,000 monthly was the expenditure when all the work was in progress, although this has been cut in half, owing to stopping the work on the 300-foot level.

North Lake Near Lode.
North Lake crosscut is in 600 ft. from the shaft, and it will require only 150 ft. additional work to encounter the first of the so-called Evergreen or South Lake lodes. This company has been very fortunate inasmuch as no hard ground has been encountered in the crosscut, and an average of 200 ft. monthly has been made, no some developments as to the probable richness of the South Lake lodes on their property will undoubtedly be known within another month.—J.
